Dear Sir or Madam:

I am writing regarding NAB's petition 04-160. In my opinion this petition should be rejected! I purchased an XM radio so I can choose what I listen to while spending time in my car and home. I could not stand to listen to commercials while driving. I love the fact that XM radio has weather and music for selected markets. I only wish that they include my local market at some point....that way I don't have to switch over to FM radio and endure commercial after commercial to see why the traffic has come to a stand still. I'm not sure about you, but where I live we only have a "handful" of radio stations worth listening too...and I get so tired of Air Supply and Peter Cetera while waiting to hear some good music. With my XM I can choose all of my favorite music - there is always something good on. In my opinion since I pay for XM radio I should not be told what I can and cannot listen to.

Thanks for listening!

Stacey
